DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-8 and 11-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Moring et al. (6,159,368). This rejection was made in the previous Office Action (mailed 12/16/05). It remains in effect. Please see Response to Arguments below.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 4 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moring et al. (6,159,368) in view of Vestal (5,498,545). This rejection was made in the previous Office Action (mailed 12/16/05). It remains in effect. Please see Response to Arguments below.

Response to Arguments

5. Applicant's arguments, filed 4/5/06, with respect to the 112 rejection have been fully considered and are persuasive. The previous rejection under USC 112 2nd paragraph has been removed. It is clear to the Examiner that a "unitary seal" is a single element that provides BOTH the first and second seals as shown in Figure 9.

6. Applicant's arguments, filed 4/5/06, with respect to the Stanchfield and Bloecker references have been fully considered and are persuasive. The rejections involving these references have been withdrawn. Applicant has amended claims 1 and 13 to include the limitation of the collar having a skirt formed along the bottom periphery of a lateral wall such that the skirt positions over a peripheral portion of the base". The Examiner agrees with Applicant that the references Stanchfield and Bloecker do not teach devices that contain this feature. Therefore, these rejections are removed.

7. Applicant's arguments filed 4/5/06 with respect to the Moring reference have been fully considered but they are **not** persuasive. As noted above, Applicant has amended claims 1 and 13 to include the limitation of the collar having a skirt formed along the bottom periphery of a lateral wall such that the skirt positions over a peripheral portion of the base". Applicant has then argued that Moring does not teach this feature. The Examiner respectfully disagrees and directs Applicant to Figure 3. As shown in Figure 3, the collar (38) has an unlabeled portion that extends from the bottom periphery of the collar and extends over a peripheral portion of the base (50). The Examiner considers this portion to be a "skirt" as required by the amended claim.

Allowable Subject Matter

8. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 10 recites a unitary seal element that provides both the first and second seals. The Examiner did not find this feature in the prior art.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1743

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
